

MEYLE PD: Advanced performance and design.  
**Cabin air filter: Make a clean start  
and breathe freely!**

**Ultra-clean cabin air** ✓

- Enriched with special impregnated active carbon and high-class filter media, leading to extra high separation of fine dust, and to chemical binding of NOx – better than OE

**Improved airflow** ✓

- Significantly increased filter efficiency for fine dust with a lower pressure loss, leading to improved airflow compared to OE

**Permanent NOx reduction** ✓

- Only from MEYLE:  
Permanently reduces NOx in the environment by binding it in the filter material as a chemical salt compound and never releasing it again

Cover fleece for pre-filtration of coarse dust

Particle medium for fine-dust separation

Impregnated active carbon layers  
for chemical binding of NOx

Carrier fleece as a base layer

Advanced design  
and technology

Ultra-clean  
cabin air

Permanent  
NOx reduction

Improved  
airflow
